

PVCu 70mm Window

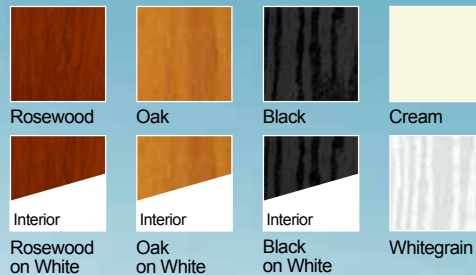

STANDARD FINISHES

PlatinumNRG Chamfered

PlatinumNRG Sculptured

OPTIONAL AVAILABLE FINISHES

Platinum
NRG

Our PVCu windows are manufactured to the very highest standards using environmentally-friendly lead-free PVCu from one of the world's leading extruders. The standard colour is white although various woodgrains or any Renolit® foil colours are available on request. Our white profile provides a more sustainable easy clean surface than most other PVCu windows. The 70mm sash is unique in the fact that it can achieve various A-Rating levels for maximum energy efficiency, thanks to its slimmer profile enabling the high technology glass to have maximum effect.

ROLLER KEEPS

Bi-directional roller locks and their corresponding keeps use two slots to allow for a secure night ventilation latch position.

HANDLE

A choice of stylish handles in a variety of colours can be specified. All handles are lockable by key.

SIDE HUNG HINGE

Side hung windows use the Cotswold friction stay - a high quality hinge that allows the entire sash to slide sideways when opened to facilitate the cleaning of the outside of the sash from inside.

TOP HUNG HINGE

Top hung sashes have the Cotswold friction stay.

SHOOTBOLTS

Each sash incorporates shootbolts at each end for increased security.

ROLLER LOCK

Bi-directional roller locks slide outwards to locate into their respective keeps.

Low-line glazing bead with low-profile gaskets for improved security and greater sightlines.

Eco-friendly PVCu profile uses calcium-based stabilisers rather than lead that most manufacturers use.

In our ongoing quest to provide the highest quality products for our customers, our designs and specifications are subject to change without notice.
